Madison Heights MI, 48071

"Survival rates after sudden cardiac arrest decrease approximately 7% to 10% with every minute that defibrillation is delayed."

(American Heart Association Circulation 2000 August 22, 2000)

AED Practice Drills One District's Results

AED Practice Drills Qualitative Benefits One District's Findings

- * The need for staff to know emergency response protocols
- * First Responder Team (FRT) refine & improve skills
- * FRT members become more comfortable and calm
- * Ascertain victim's exact location including landmarks
- * Page FRT two or three times over the PA system
- * Ensure FRT members have access to anywhere in facilities
- * To have important phone numbers listed by all phones
- * FRT really appreciate the opportunity to practice skills
